BEST WAY TO CONTACT YOU WITH RESULTS (PHONE #/E-MAIL)

NAME/ID/PEN	Species	Dewormed in last 2wks?	Results (office use only)

The goal of this study is 2-fold, 1) determine the incidence of GI parasites within our clients herds, and (2) determine the existence of dewormer drug resistance within our herds. In order to achieve these goals we need you to deworm the animals from which these samples were submitted, and resubmit a fecal sample 2-weeks following deworming. This service is provided free of charge for the first 200 samples, but we ask that you please follow up with deworming and resubmission of a fecal sample.
